Effects of feedback

Effective Feedback Cultures

Introduction: Presentation of successful cultures and their commonalities

Trigger Points

Avoid rejecting feedback by being aware of your personal trigger points

Feedforward

Method for decreasing the risk of confrontations during feedback

Feedback and Personality

Exercise that shows the difference in individual preferences.

10 Essential Feedback Skills

Training element that gives you an understanding of 10 best practices when giving feedback

Millennials / Generation Y

How should we take the new generation and preferences into account?

What can you expect?

Output.

Form

The presentation will take form as a combination of a talk and practical testing of the tools and methods. A greater understanding will be achieved by the mixture of formats and media. The inspirational talk will be characterized by high levels of engagement and involvement of

the participants. All participants will be able to feel the positive impact of feedback on themselves. The duration of the talk can be modified between 60 and 120 minutes depending on your conditions and wishes.

Output

This event is specially great for large groups of employees or members who are to build a common language and attitude towards feedback in communication. The presentation will give the participants knowledge on how they can

actively contribute to your feedback culture. They will gain knowledge and their first practical experience with several of our tools and methods. This presentation is the right choice if you want to raise attention on feedback in your entire department or organisation.
